

Laura

Video transcript

I am Laura McGuigan, I work for the triple E's department in Glasgow and I am a Senior Engineer.

I mainly work on Nuclear Power Plants looking at safety aspects. I really enjoy getting off site because I get to get my PPE on, my hard hat, my boots, my overalls; go about power stations have look at all the big toys, have a look at all the big systems and control systems and basically just see the actual industry at the ground level.

I really enjoy being in Frazer-Nash especially the Glasgow office. Everybody in the office is always full of support and always full of fun.
