

At Frazer-Nash, our consultants apply their know-how to develop, enhance and protect our clients' critical assets, systems and processes. We work in the digital and physical worlds.

We're renowned for our work in the government, aerospace, transport, nuclear, marine, defence, power and energy sectors and our security, resilience, cyber and information technology expertise.

We use our combined strengths to deliver solutions to the most challenging problems. Sometimes these challenges are difficult technical issues; sometimes they are difficult because of the environment our clients operate in.

“ Our Systems Approach helps us respond to your challenges. We work with you to understand the whole range of financial, operational, organisational, people and other issues that surround your technical needs. And we use this understanding to deliver demonstrable business and technical value. ”

## Covering digital, electrical and mechanical systems, our expertise includes:

### Strategy and management

- Programme management
- Asset management
- Enterprise modelling
- Cost/benefit analysis

### Systems engineering

- Technical advice
- Requirements and acceptance
- System architecture and design
- Human factors

- Spatial data infrastructure
- Policies and standards
- Data management

### Software and modelling

- Artificial intelligence
- Data analytics
- Visualisation and augmented and virtual reality
- Digital twin
- Engineering models and sensors
- Information modelling
- Software engineering

## Our Systems Approach

Sometimes, a defined approach to a specific problem is all that is required. But more often than not, engineering projects are framed by the wider context in which information systems will be applied. So whatever the project we take a holistic view.

Our Systems Approach helps us respond to our clients' challenges. We work with them to understand the whole range of financial, operational, organisational, people and other issues that surround their technical needs. And we use this understanding to deliver demonstrable business and technical value.

## Our people

The best results come from the best people. Our employees are talented, original thinkers who exchange ideas, share their knowledge and collaborate enthusiastically. We only employ those who combine outstanding technical expertise with commercial awareness. We look for people of openness and integrity who can work well with their colleagues, engage with our customers and get to the heart of the problem.

## A career with Frazer-Nash

We're continuing to grow and to help meet the demand for our services; we're looking for a wide range of specialists to join us.

## Your talent can make a difference

A career with us will mean working with world-class clients, collaborating with like-minded people and contributing your talent to the wider team. You will have the opportunity to work in diverse industries, and throughout your career you'll reap the rewards associated with your personal and professional development.

## Your next move

If you'd like the opportunity to flourish within a collaborative environment, where creative thinking and entrepreneurial talent are recognised and rewarded, we want to hear from you.
