

At Frazer-Nash, our Systems Approach helps us respond to your challenges:

Do you know what your risks are? What are the threats to your organisation and its assets?

Do you have a reliable way of comparing the cost effectiveness of different approaches to managing your risks?

Do you have a strategy for late life and decommissioning?

Are your designs fit for purpose?

Are you using your assets effectively to help maximise your profits?

Does your business plan reflect the changing economic climate?

Is it time to re-asses your operating model?

Our Systems Approach

At Frazer-Nash, our Systems Approach helps us respond to your challenges.

Our experts work with you to understand the whole range of financial, operational, organisational, people and other issues that surround your technical needs. And we use this understanding to deliver demonstrable business and technical value.

Adding value to the oil and gas industry

We're renowned for our expertise across the oil and gas, defence, aerospace, power, industry and transport sectors. We use advanced engineering analysis to improve safety, efficiency and performance. And we provide independent advice to minimise risks and reduce costs and liabilities.

Our clients know they'll get the very best in strategic planning, project management, design and technical support, which is why many of the world's leading private and public sector organisations use us to overcome some of their greatest challenges.

With experience across the development life cycle, from requirements definition and project delivery through to recycling and disposal, our specialists provide a comprehensive and tailored service. With access to the wide breadth of skills and expertise within the whole company, there's someone, somewhere who has the solution to even the most complex problem.

Our quality management system underpins our commitment to delivering the very best for our clients – by providing robust systems and procedures to manage the core aspects of our business.
