

Frazer-Nash Life

Video transcript

I'm a solicitor at Frazer-Nash.

I'm an engineer in Aerospace Capability Integration.

I am a Group Leader for Technology Management.

I am a Senior Engineer mainly doing software development.

I work on Electromagnetic Compatibility Projects.

I'm the Company Facilities Manager for Frazer-Nash.

I work as an HR Business Partner.

My job title is an Economic Assessor.

I'm a Senior Consultant.

I'm a Consultant, I lead the drone side of our business.

I'm a Front of House Coordinator at Frazer-Nash.

I think there is a real enthusiasm for knowledge at Frazer-Nash and everyone is so keen to learn.

Working with a cumulative team of individuals is one of the great things about working for Frazer-Nash.

Everybody's day in the office is always full of support and always full of fun.

I find it an exciting place to be. We are growing, there's a feel of positivity within the Company.

It's a very positive place to work and you're always working with like minded people. It's a closely knit family and everyone really cares about your development.

It's that learning process, that sense of building something and growing as an individual that really makes this job enjoyable.

The best part about my job is the development opportunities that are available.

There's always something going on to keep you engaged and happy – yeah they definitely care about you which is a nice feeling.

I really like the fact that there is open levels of communication across senior levels all the way down to new joiners such as myself.

There is a really productive but relaxed atmosphere and I'm really enjoying that. Resolving challenging complex problems with some great people and having a real impact on the world.
